Field Visit to Typical AMR Project of Gas Metering in Baoshan District, Shanghai

Time/Date: 09:00 – 12:30 September 17

Venue: Baoshan District, North Shanghai gas business Co. Ltd

About the Project

The pilot AMR project of gas metering locates at Baoshan district, Shanghai, and it is invested by North Shanghai gas business Co. Ltd. All the wireless Smart gas meters were installed by Zhengzhou Anran Co., Ltd. in 2007. Total 52,329 pieces of meters are distributed in 77 residential communities.

This year, North Shanghai gas business Co. Ltd conducted an overall investigation on this project and obtained an ideal result: 100% accurate data collection rate by point-to-point reading model; Success rate of one-time reading is 99%; time-cost for point-to-point meter reading is less than 6 seconds and average time-cost for full AMR is only 1 second per apartment. By this AMR system, meter reading efficiency has been improved significantly and the loss caused by non-measuring also can be reduced by remote management.

Participants by visiting the project site will learn the details of this pilot AMR system and experience the advantages as well as disadvantages of this project.

Cost: RMB300, including the transport from/to the hotel
